

TRANSTRAX®

DELIVERING CUSTOMER TRANSACTIONS TO DIFFERENT VEHICLE HEIGHTS

*With the TransTrax®, drive-thru is convenient to all of your customers,
no matter what size vehicle they operate!*

The TransTrax®:

- Includes an audio system designed specifically for drive-thru
- Is capable of transporting rolls of coins
- Requires no power at the customer island, lowering installation cost
- Uses inexpensive carriers
- Has only **one** motor rated for 10,000 hours of trouble free and quiet operation
- Operates with only four moving parts
- Small profile requires a smaller island which lowers canopy and real estate cost

TransTrax® does not take up any valuable counter space and provides an excellent line of sight between customer and teller.

*Carriers can be positioned at both truck and car heights.
A convenience your customers will appreciate.*

NATIONAL SAFE

**It's so easy
to use.**

Simply remove carrier, place transaction inside, replace carrier and press the easy to reach send button.

CUSTOMER FRIENDLY

Unlike most competitive transport systems, the TransTrax[®] has complete control of the carrier. This allows the TransTrax[®] to:

- Transport more weight
- Stop at car and truck heights
- Be retrieved in the event of a power failure

Economical Basic Model TransTrax[®]

CarlTruck Model TransTrax[®] with dual height customer controls, microphone, speaker and call button.

Optional housing shown with CarlTruck Model TransTrax[®]
